

Parabolic LED

Modern louver luminaire for LED light sources of high technical and optical performance. The luminaire has a very low glare rate thanks to aluminum parabolic louvers as well as low power consumption comparing to traditional light sources. Parabolic LED thanks to the innovative optical system is ideal for lighting office spacer, in particular to work with computers.

Attention: possibility of mounting "Active+" - self-learning energy saving system.

Active+ is an out-of-the-box standalone solution consisting of an LED driver and small sensor built into the luminaire. Luminaires fitted with Active+ solution are ideal for refurbishment projects, as well as for new offices, corridors, open plan areas, etc.

Materials: White housing made of electrostatically painted steel, parabolic louver made of anodized, polished aluminum of high purity, LED module with additional microprismatic diffuser. Standard version for suspended ceilings has accessories, which make montage of suspensions possible.

Installation: 600x600 suspended ceiling with visible supporting structure, plaster-cardboard frame to 600x600, surface mounted, suspended.

Accessories: Plaster-cardboard frame to 600x600 version, suspension (simple and electric).

Power: 230V
